

## CSCE 190

Problem Statement: Gyms get very busy and wait times for machines get very long at peak hours, peoples time is valuable and an app that shows wait times at the gym would allow people to schedule their workouts better.

Group Name: The Ryans

Wait time app

- 4 W's: Who is experiencing the problem?
  - Everyone. Specifically, people who do not like waiting in lines or do not have a lot of time to wait around at the gym.
- What is the Problem? People who do not know how busy the gym is end up waiting, wasting time at the gym waiting for equipment to open up.
- Where does the problem present itself? A lot of gyms, nowhere is safe. Especially, though, at The Strom Thurmond Gym.
- Why does it matter? Because it's literally a waste of time. People's time is important, especially for college students.
